WELLS  
Bwrdd Iechyd Prifysgol  
Caerdydd a'r Ffr  
Cardiff and Vale  
University Health Board

**HSC** Health and  
Social Care

## Complete car park management for the NHS

We know the NHS is stretched. Our solutions help Trusts manage their parking without creating additional work for busy teams.

### Protect complex sites with ANPR

**Noticeable results within 3 months**

Hospital sites are complex, juggling the needs of patients, staff, and visitors 24/7. ANPR helps you achieve a finer level of control over your parking, increasing vehicle throughput, space turnover, and access to spaces.

### Balance staff and patient parking with permits

**Tailored solution for the NHS**

Hospital staff need to be able to park in a location that makes it easy for them to get to their shift. Our powerful cloud-based permit system gives NHS teams access to parking permits without the extra admin.

### Boost revenue with flexible payment options

**40% increase in revenue for a leading Trust**

Evology provides flexible options for paid parking tailored to the needs of your visitors. Whether that's paid parking, autopay, pre-booking or app-based payments. That flexibility makes a car park more adaptable, better serving your visitors while driving extra revenue that can be reinvested back into your Trust.

## Greener Ways of Travelling

Providing charging facilities at a hospital car park is a fantastic way to work towards the ambitious environmental goals the NHS has. Supporting a developing EV infrastructure, as well as helping your car park access an invaluable new revenue stream.

### We provide an EV charger with a difference:

- An ANPR camera is housed inside the charger, which helps to ensure your spaces are protected from misuse
- 24/7 Monitoring ensures 99% uptime and reliability.
- Rapid charging
- AC and DC options let you tailor charging output.
- Tap&Go payments for extra speed and convenience.

## Bay Management technology

NHS car parks naturally have increased accessibility requirements and a need for dedicated spaces. We've created a powerful, patented, new solution that protects those crucial places in your car park, reducing complaints, congestion and supporting the accessibility needs of your visitors.

### Accessible Parking

Misuse of disabled bays can make the difference between a vulnerable patient making it to an appointment on time or not. We make sure all your Blue Badge visitors have somewhere to park, whilst helping them to access key services.

### Ambulance Bays

Prevent anyone from blocking critical access points to improve safety and responsiveness, protecting access to your most vital services.

### Prescription collection service

Streamline your on-site pharmacy services with powerful notifications that let you know when a patient or delivery driver has arrived to collect medication.

## It's never been easier to partner with Parkingeye

We make it as easy as possible to work with us. We are registered with a number of frameworks, including ESPO, Constellia, and Crown Commercial Services.

When you work with Parkingeye, you get access to teams of dedicated parking experts, including our specialised NHS Account Management Team. We're there at every stage of your parking journey, from initial onboarding to your site going live and beyond.
