

Unlock Revenue with Parcel Lockers

Your car park can house a range of options to empower your business and its ability to generate revenue. Aside from services like flexible paid parking, EV charging and pre-booking, there are services that enhance your car park, without necessarily being linked to parking.

One of these options is to install parcel lockers on your site.

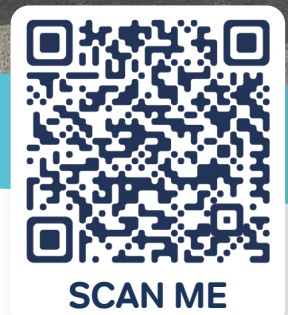

Make extra space work harder

Unused or underutilised space on a car park can be easily converted into a parcel locker, an effective option for deliveries for both businesses and consumers, which in the process adds a beneficial new asset to your site, for zero cost!

The benefits of a parcel locker

- ✓ **Boost Revenue** – gain annual, recurring income for locker rental.
- ✓ **Increase Footfall** – create new reasons for your business to be a destination.
- ✓ **Zero cost to install** – access new revenue streams without incurring additional installation costs and fees.
- ✓ **B2C and B2B options** – cater to demand in your area of the needs of your site.
