

Car Park Management Spotlight: Restaurants

Parkingeeye has worked with some incredible restaurants, pubs and hotels, helping the hospitality sector to deliver a fantastic visitor experience and make sure that every site leaves the right impression on their guests.

Brands we work with...

"We initially had a different supplier, but we ran into issues that impacted customers and didn't stop the misuse of car parks, so we made the jump over to Parkingeeye based on the reviews we had seen. Since then, we've had much clearer communication and greater flexibility. We couldn't be happier."

"Since we made this move over to Parkingeeye for our car park management we could not be happier with their service."

"We had an issue with space availability which was compounded by non-customers using the site and some poor parking practices. The Parkingeeye team transformed the site in a matter of weeks with minimum fuss - congestion is a thing of the past, there's adequate space for hungry customers and complaints are non-existent. I couldn't recommend them highly enough."

"Parkingeeye have been down-to-earth, realistic, helpful, and understanding. They take pride in their work and cater to our bespoke needs when appropriate."

Car Park Management Spotlight: Restaurants

How we support restaurant parking:

Protect spaces with Bay Management to improve accessibility

Remove ageing technology and barriers to streamline and modernise parking

Stop overstay and congestion to improve space turnover and accessibility

Provide better access through pre-booking, enhancing your reservations

Build new infrastructure and enable new guest services through EV so they can top-up their battery during their stay

Develop a deeper understanding of guests and their requirements through ANPR data
